RE: Docket No. S-030

S-030
EX. 2-29

Dear Sirs or Madam:

We would like you to consider Dennis J. O'Rourke for a member of your Crane and Derricks Negotiated Rulemaking Advisory Committee.

Attached please find Mr. O'Rourke's resume outlining his 44 years of crane experience. He was on the Advanced Rule Committee on man basket standards recommending changes to 1926.550. Tom Jones, OSHA was the committee chairman. Mr. O'Rourke was also a member of the US Dept. of Energy committee, which set the standards for lifting in containment for the Nuclear Industry. Mr. C.A. Munro was the committee chairman. Mr. O'Rourke was on the committee involved with the P307, change 9 for the US Navy. He was also under contract by US DOL/OSHA to review all OSHA citations given for crane activities under 1910.180 and 1926.550 during 1971 to 1981.

Mr. O'Rourke is currently the vice-president of the Crane Certification of America Association organization. He personally performs crane inspection, training, and various board advisory services on a day-to-day basis.

As President of National Crane Services, Inc., Mr. O'Rourke has the ability to commit the necessary time and resources to perform committee membership responsibilities.

Mr. O'Rourke has been on many successful committees in the past and is a crane expert in many areas. He is interested in being involved in a good faith effort to provide support to the crane industry.

If not selected to the committee, he would like to be placed on the committee mailing list and make written comments.

Please advise.

We appreciate the opportunity and look forward to working with you.

Regards,
