RE: Docket No. S-030
ASSE Nomination for Cranes and Derricks
Negotiated Rulemaking Advisory Committee

Dear Assistant Secretary Henshaw:

Enclosed please find materials offered by the American Society of Safety Engineers (ASSE) in response to the Occupational Safety and Health Administration (OSHA) request for nominations to the Cranes and Derricks Negotiated Rulemaking Advisory Committee (C-DAC).

ASSE is submitting the name of Everett A. Beaujon, CSP, CHMM, who, as the attached biographical information indicates, has a lifetime of excellent safety experience in construction and maintenance. Mr. Beaujon is well known in the safety community for his expertise in cranes and derricks and for his overall professionalism and integrity, qualities that will serve to represent the interests of the public and the safety profession on C-DAC.

ASSE, with over 30,000 members, is the oldest and largest professional safety association. The Society has been committed to the workplace protection of people, property and the environment since 1911. This commitment includes helping ensure that the decisions made by federal safety agencies like OSHA involve the wealth of expertise and experience readily available from leaders in

the safety profession. Mr. Beaujon is such an individual. A review of his credentials will demonstrate why he warrants consideration for C-DAC membership.

Thank you for your time and consideration. If we may be of any further assistance in facilitating a meeting with Mr. Beaujon or providing additional information, please do not hesitate to contact the society.

Sincerely,

A handwritten signature in black ink that reads "Mark Hansen". The signature is written in a cursive style with a large, prominent "M" and "H".

Mark D. Hansen, PE, CSP
President
