RE: Cranes & Derricks Negotiated Rulemaking Advisory Committee (C-DAC)

Gentlemen:

The Precast/Prestressed Concrete Institute (PCI) has an interest in OSHA's work to revise the Crane standard. Crane problems represent one of the areas creating a greater hazard during the erection of precast and prestressed concrete members.

Our Institute represents producers and erectors of precast and prestressed concrete, and their concerns are being addressed by the PCI Erectors Committee. It is our understanding that Robert Weiss one of our committee members has applied for the Cranes & Derricks Negotiated Rulemaking Advisory Committee. He is also an active member of our affiliated Mid-Atlantic Precast Association (MAPA) Erector's Committee.

PCI wishes to strongly endorse the selection of Mr. Weiss to serve on C-DAC (Subpart N Revision) and to be the voice of our Institute's and MAPA's Erectors Committees.

Very truly yours,

Sidney Freedman, Director
Erection Safety Services
