Dear Docket Clerk:

On behalf of the 205,000 members of the National Association of Home Builders (NAHB), I appreciate the opportunity to offer you two candidates for the Occupational Safety and Health Administration's Cranes and Derricks Negotiated Rulemaking Advisory Committee (C-DAC). Cranes are utilized for a variety of tasks during the residential construction process, such as assembling manufactured sections of modular housing and installation of roof trusses during conventional construction, therefore home builders will be affected by the proposed rule. NAHB's builder members will construct about 80 percent of the almost 1.6 million new housing units projected for 2002, which accounts for nearly fifty-percent of all construction that is put in place. With this in mind, NAHB believes that it is imperative for this committee to have adequate representation of the interests of this important industry sector. The following are NAHB nominations for appointment to OSHA's Cranes and Derricks Negotiated Rulemaking Advisory Committee:
