Washington DC 20210

18 Sept 03

## Request for corrections

About 6 weeks ago OSHA and the committee members were supplied with a CD following a presentation to the committee for Revision of Subpart N for cranes and derricks. In order that work may be done prior to committee could you please notify me of any factual errors you may have noticed in reviewing the material?

(Most of this material is listed on the OSHA web at docket S030. document 1572766 to 1572854)

Yours truly,

Hugh Pratt
